Profile

Motivated and detail-oriented MERN Stack Developer with 1+ year of hands-on experience in building dynamic and responsive web applications. Proficient in MongoDB, Express.js, React.js, and Node.js, with a strong foundation in modern web development practices. Skilled in problem-solving, debugging, and developing user-friendly interfaces. Passionate about continuous learning and staying updated with the latest technologies to deliver efficient and scalable solutions.

Experience

MERN Stack, Dignizant Technology 04/2025 – 08/2026

- Developed and maintained responsive web applications using React.js and Next.js with seamless REST API integration.
- Built frontend for Breakdayz, a live enterprise HRMS & Project-based PMS platform — including attendance tracking, shift management, and role-based access control (RBAC) UI.
- Designed reusable UI components and managed complex form workflows using React Hook Form and Redux Toolkit.
- Collaborated with backend teams to integrate APIs, ensuring smooth data handling and optimized, cross-browser compatible performance.

Web Design, Intebility Solutions 05/2023 – 06/2023

- Assisted in designing and developing responsive web pages using HTML, CSS, and JavaScript.
- Worked on UI layouts and styling to improve visual consistency and user experience across pages.
- Learned foundational web development practices including cross-browser compatibility and basic responsive design principles.
- Gained hands-on exposure to real-world web design workflows under guidance of senior team members.

Education

Bachelor of Technology in Information Technology, Marwadi University 2020 – 2024
NAAC A+ accredited Rajkot, Gujarat

Project

HRMS & Project-Based PMS System

- Developed a comprehensive enterprise-level HRMS with features like attendance tracking, shift management, leave workflows, and project-based approval systems.
- Designed and implemented intuitive user interfaces for hierarchical workspace structures, including branch, department, and designation management.
- Built dynamic UI components for automated shift scheduling, overtime calculations, and monthly attendance summaries.
- Integrated frontend workflows with backend services using APIs, ensuring smooth data handling and real-time updates.
- Collaborated with backend teams leveraging technologies like Redis for efficient background job processing and queue management.
- Implemented secure authentication flows and role-based access control (RBAC) to ensure data security and proper user permissions.
- Focused on responsive design, performance optimization, and cross-browser compatibility for a seamless user experience.

AI-Powered Expense Tracker

- Developed a full-stack AI-powered expense tracking application to manage and analyze personal finances efficiently.
- Built responsive and user-friendly frontend interfaces for adding, categorizing, and visualizing expenses.
- Implemented backend services and APIs for secure data handling, authentication, and real-time expense management.
- Integrated AI-based insights to help users understand spending patterns and improve financial planning.
- Designed features like expense categorization, summaries, and interactive dashboards for better data visualization.
- Ensured secure user authentication and data protection using modern web development practices.
- Optimized application performance and responsiveness across devices.

MERN E-Commerce Store

- Developed a full-stack e-commerce web application using the MERN stack for seamless online shopping experiences.
- Built responsive and dynamic frontend interfaces for product listing, search, filtering, and cart management.
- Implemented backend APIs for product management, user authentication, order processing, and secure data handling.
- Designed and integrated features like user login/signup, product details pages, and checkout workflow.
- Managed state efficiently for cart and user sessions to ensure smooth user interactions.
- Integrated database operations for storing products, users, and orders with optimized query handling.
- Focused on performance optimization, scalability, and responsive design across devices.
